БИОПРОЦЕСНИ СИСТЕМИ

Моделиране, управление и оптимизация

**BIO
PROCESS
SYSTEMS**

Modeling, Control and Optimization

Монографичен сборник

Под редакцията на проф. д.т.н. **СТОЯН ЦОНКОВ**

СОФИЯ, 2004

Bioprocess Systems: Modeling, Control and Optimization

A monograph, Editor Prof. Stoyan Tzonkov, D. Sc.

240 pages, 106 figures

East - West, 2004

ISBN 954-321-078-0 (in Bulgarian)

CONTENTS

CHAPTER ONE: SPECIFIC PECULIARITIES OF BIOTECHNOLOGICAL PROCESSES AS CONTROL OBJECTS

Stoyan Tzonkov

- 1.1. Overview of biotechnological processes
- 1.2. Physic-chemical peculiarities of biotechnological processes
- 1.3. A classification of biotechnological processes and productions
- 1.4. Parameters of controllable processes for cultivation of microorganisms

CHAPTER TWO: MODELLING OF BIOTECHNOLOGICAL PROCESSES

- 2.1. Modelling of a fermentation process of L-lysine production
Tatiana Ilkova
- 2.2. Modelling of a class of biotechnological processes as objects with distributed parameters
Tania Pencheva, Iasen Hristozov
- 2.3. Modelling of fermentation processes based on functional state modelling approach
Iasen Hristozov, Tania Pencheva, Olympia Roeva
- 2.4. An identification of operative regimes of complex biotechnological systems
Yuliana Hristova

CHAPTER THREE: OPTIMIZATION AND CONTROL OF BIOTECHNOLOGICAL PROCESSES

- 3.1. An application of methods of dynamic and neuro-dynamic programming for optimal control of fermentation processes
Tatiana Ilkova
- 3.2. Variable structure control in sliding mode
Plamena Zlateva
- 3.3. A Takagi- Sugeno type fuzzy logic controller for continuous biotechnological processes
Iasen Hristozov, Tania Pencheva, Boyko Iliev

CHAPTER FOUR: AN APPLICATION OF EXPERT SYSTEMS FOR CONTROL OF BIOTECHNOLOGICAL PROCESSES

Krassimira Ljakova

- 4.1. Introduction
- 4.2. An organization of expert systems. Methods of knowledge performance
- 4.3. Applications

CHAPTER FIVE: MODELLING AND OPTIMIZATION OF STIRRED BIOREACTORS

Mitko Petrov

- 5.1. Introduction
- 5.2. Mathematical models of stirred bioreactors
- 5.3. Experimental investigations and models identification
- 5.4. An application of the theory of fuzzy sets for bioreactors optimization

CHAPTER SIX: SENSORS FOR MONITORING OF BIOTECHNOLOGICAL PROCESSES

Yordan Kostov

- 6.1. Introduction
- 6.2. Type of sensors for biotechnological measurements
- 6.3. Traditional sensors - principles and examples
- 6.4. New type of sensors
- 6.5. Examples for optic sensors
